

BURAK DALIAHMAD

Address: Mashrou Al-Zein, Latakia, Syria
Phone: +963-949896034
Email: burakdaliahmad@gmail.com
Gender: Male
Age: 29 Years old, 7/8/1997
Linkedin: <https://www.linkedin.com/in/burak-daliahmad>

SUMMARY

Software Engineer with 4+ years of experience specializing in Laravel, Node.js/TypeScript specially in Nuxt.js, Vue.js and Odoo ERP Development.

Proven track record in building digital transformation projects, including Queue Management Systems, Visitor Management Systems and secure, high-traffic e-commerce platforms. Expert in designing scalable database architectures, real-time communication systems via Socket.io, and cross-platform desktop applications. A Certified Odoo Specialist with a strong focus on engineering clean, maintainable code while maintaining a modern, minimalist approach to UI/UX and professional DevOps workflows.

WORK EXPERIENCE

Backend Web Developer | Davinda company

May 2026 - Currently

Key Responsibilities & Achievements:

- Built and maintained production-grade RESTful APIs in Laravel 12 with Sanctum-based Bearer token authentication, ensuring secure and scalable client-server communication.
- Authored comprehensive Swagger/OpenAPI documentation, streamlining API discoverability and reducing onboarding time for new developers.
- Engineered analytics data solutions using PostgreSQL and TimescaleDB, enabling efficient handling of large-scale time-series datasets for reporting and business intelligence.
- Administered and optimized MySQL databases, focusing on query performance and data integrity across multiple projects.

Programming Instructor | Faculty of Applied Sciences Two Semesters

Currently

Key Responsibilities & Achievements:

- Curriculum Delivery: Instructed university-level courses on programming languages and Introduction to Information Technology (IT).
- Technical Communication: Simplified complex technical concepts for diverse audiences.
- Documentation & Assessment: Responsible for preparing instructional materials, documenting student progress, and evaluating technical proficiency.
- Mentorship: Provided hands-on guidance to students, fostering a supportive learning environment similar to post-implementation functional support.

Website Development — Smart Solutions Suppliers (SSS) Ongoing — Final Testing Phase

June - 2026

Key Responsibilities & Achievements:

- Led full software development lifecycle (SDLC) activities including requirement engineering, system analysis, design, and development for a corporate website for Smart Solutions Suppliers (SSS).
- Conducted requirement gathering and analysis sessions with stakeholders to translate business needs into functional and technical specifications.
- Designed system architecture and database schema based on analyzed requirements, ensuring scalability and maintainability.
- Developed core website functionalities in accordance with approved design specifications.
- Currently leading final testing and quality assurance phase to ensure system readiness for deployment.

Front-end Developer, Future Solutions for IT, FSIT**Jan 2026- April 2026****Key Responsibilities & Achievements:**

- Front-End Developer specializing in Nuxt.js 3 and Vue.js, with hands-on experience delivering responsive and high-performance web applications.
- Designed and developed complete web solutions, from concept-driven landing pages to full-scale platforms for official UAE institutions.
- Focused on clean architecture, reusable components, and seamless user experience across devices.
- Collaborated on delivering production-grade applications aligned with business and institutional requirements

Full-stack Developer, Zeour.Ltd, <https://www.zeour.co.uk>**Aug 2023 - Jan 2026****Key Responsibilities & Achievements:**

- Led the development of 5+ major digital transformation projects, taking full ownership from concept to production.
- Designed and implemented database schemas, system architecture, and project workflows to support scalable and efficient operations.
- Selected and integrated the best-fit technologies across backend, frontend, and communication layers to meet business and performance requirements.
- Developed modern frontend interfaces using React/Next.js, Vue/Nuxt, and traditional Blade + AJAX/jQuery stacks.
- Implemented real-time communication using Socket.io, enabling notifications, live updates, and high-performance communication channels.
- Built backend systems using Laravel with MySQL, SQL Server as database management systems.
- Contributed to full lifecycle development, including planning, architecture design, coding, optimization, deployment, and maintenance.
- Developed applications optimized for deployment on self-service kiosks.

Back-end Web Development Intern | Focal X (L.L.C)**Aug 2023 - Nov 2023****Key Responsibilities & Achievements:**

- Advanced Back-end Specialization: Successfully completed the Level 2 curriculum, focusing on complex server-side logic and database management.
- Professional Internship: Engaged in a structured four-month program designed to simulate real-world development cycles and project requirements.
- Technical Proficiency: Demonstrated strong performance in back-end architecture, earning a "passing grade" certification upon completion.

Windows Form C# Application Developer, Hassad app at Value company**July 2022- Oct 2022****Key Responsibilities & Achievements:**

- Maintained and enhanced a Windows Forms (C#) accounting application used in daily business operations.
- Designed and implemented new features, improving workflow efficiency and expanding system capabilities.
- Worked with SQL Server to manage database structures, write queries, and optimize data operations.
- Collaborated with the team to support ongoing system improvements and ensure alignment with business needs.

EDUCATION**Master In Web Science MWS****Jan 2022- Now**

Syrian Virtual University.

Bachelor of Informatics Engineering.**Sep 2015- Sep 2021**

Latakia University, Major in Software Engineering.

COACHING SCHOLARSHIP

Odoo Developer Specialist | EBTECH Technologies

Apr 2022

Successfully completed 50 hours of training focused on Odoo development and implementation.

TECHNICAL SKILLS

- **Backend:** Laravel (JWT, RESTFUL API design, authentication, RBAC, Authorization, middleware, Unit & Feature Tests), Odoo Development, Node.js/Express, TypeScript, RESTful APIs, real-time systems (Socket.io).
- **Frontend:** React, Next.js, Vue, Nuxt 3, Blade, jQuery, AJAX, TailwindCSS.
- **Database:** MySQL, SQL Server, SQLite, Prisma ORM, advanced schema design, migrations, optimization.
- **Desktop Development:** Electron (React), Windows Forms (C#).
- **ERP Systems:** Odoo Development (Specialist Certified), Custom Module Development, XML-RPC, Odoo ORM.
- **Security:** JWT, HttpOnly cookie auth, input sanitization, CSP, encryption, role-based access control.
- **DevOps & Tools:** Git/GitLab, Cron jobs, Redis, Odoo Studio, deployment on Linux VPS, symlinks.
- **Architecture:** Full project lifecycle from schema design and backend architecture to frontend implementation and deployment.

ACTIVITIES & STRENGTHS

- Hands-on experience leading full-stack projects from scratch, including architecture, design, and implementation.
- Creative in selecting the best technology stack for each project's requirements.
- Strong problem-solving approach, able to debug complex backend, UI, and deployment issues.
- High adaptability comfortable switching between frontend, backend, desktop apps, and real-time communication systems.
- Ability to work independently on large-scale systems and deliver stable, production-ready software.
- Public Speaking: Confident in presenting to large audiences and maintaining authority in a classroom setting.
- Patience & Empathy: Skilled at identifying individual student roadblocks and providing alternative explanations to ensure comprehension.

SOFT SKILLS

- **Working Under Pressure:** Able to handle tight deadlines, manage multiple projects simultaneously, and deliver stable, production-ready results even in high-pressure environments.
- **Communication Skills:** Strong verbal and written communication, capable of explaining technical concepts clearly and collaborating effectively with both technical and non-technical teams.
- **Team Collaboration:** Comfortable working in team-based environments, coordinating tasks, conducting reviews, and supporting colleagues to achieve shared goals.
- **Adaptability:** Quickly adjusts to new technologies, frameworks, and challenges. Strong ability to learn, research, and integrate modern tools into existing workflows.
- **Attention to Detail:** Strong focus on clean code, security, performance, and avoiding production issues through careful planning and testing.

ADDITIONAL INFORMATION

- **Hobbies:** Video Editing: Experience with montage, timeline editing, effects, and audio syncing.
- **Languages:** Arabic (Native), English (Fluent) , Turkish (Intermediate).
